

Welcome! In this month's issue, find and try out our ASC performance calculator! We'll also discuss OR efficiency and unexpected benefits of arthroplasty.

---

## **Is Your ASC Underperforming?**

*Compass Surgical Partners*

Try the orthopaedic [ASC performance calculator](#)! Determine your center's potential by entering simple case volume data.

What should you expect from your ASC? What keeps your ASC from performing at the highest level? Use the inputs to determine what mix of ortho volume and rate inputs deliver desired results. How does it compare to your current situation?

Change is difficult. But maybe it's worth it.

## **Obtaining True OR Efficiency with Radical Time Transparency and Operational Excellence**

*JOEI: Dr. Charles DeCook & Dr. Jeremy Statton*

True surgical efficiency and value are more important than ever. Applying the same principles used in disruptive industries, industry-leading surgeons believe they can improve the value they contribute to the healthcare industry. It [starts with time transparency](#).

# Robert Carrera Appointed as Compass Chief Operating Officer

*Compass Surgical Partners*

Compass appoints Carrera as its next COO. Alongside CEO DJ Hill, President Sean Rambo, CFO Marissa Freedman and the rest of the team, Carrera will continuously improve center operations through the integration of innovation in data and analytics, physician services, value-based care, and service delivery models. Read the [full press release here](#).

---

## Unexpected Benefits of Arthroplasty

*The Bone & Joint Journal*

Arthroplasty is a cost-effective, life-changing intervention for over a million US patients each year. Beyond pain relief and improved function and quality of life, there may be other benefits. Read the [full article](#) here.

---

## What's Holding You Up?

*Data Transparency*

Our partners have cited data transparency as an important issue as ASCs continue to evolve. We have also noticed wildly different approaches to providing transparency in ASCs.

I'm curious to know what others experience, as it impacts how we tailor our approach to meet the needs of our partners.

Do you see surgeon specific supply cost data from your facility? Are surgeon-based metrics for OR utilization, case volumes, supply utilization, etc. shared broadly with the medical staff? **What is the appropriate level of transparency (e.g. analysis paralysis vs. flying blind)?**

Compass is committed to innovation in the analytics space. [Reply to this email with any ideas, pain points, interesting innovations, etc.](#)
